

### Lacing Cord

Lacing cord is one of the oldest, surest and neatest methods of holding together a loom and is available in two material types:

MV, a nylon braid impregnated with a microcrystalline wax which provides excellent resistance to mould growth; and PNF, a nylon braid with a PVC sheath in reels of 200, 250 and 500m

#### Material Specification – MW

Material	<b>MW062, MW090</b>
Continuous Operating Temperature	<b>-30°C to +70°C</b>
Complies with	<b>MIL-T-43435 Type 1</b>
Standard Colour	<b>Black, Natural</b>

#### Ordering Information & Technical Data

Part Number	Width	Thickness
<b>MV062</b>	1.50	0.30
<b>MW090</b>	2.30	0.30
<b>PNF1012</b>	1.0	-

#### Material Specificatio – PNF

Material	<b>PNF1012</b>
Continuous Operating Temperature	<b>-40°C to +85°C</b>
Complies with	<b>Def Stan 40-8 (1mm)</b>
Standard Colour	<b>Black</b>
