

Weldy-Pro Heat Gun

This compact, lightweight heat gun is designed for use with all grades of heatshrinkable sleeving. The specially designed handle incorporates a non-slip grip, also built into the body is a non-slip tool stand for bench work. Air flow adjustment through a two-step switch 250/500 l/min, power 1800 watts. Adjustable temperature range from 100°C up to 550°C.

Weldy-Pro Heat Gun	
Part Number	Description
Weldy-pro	Heat gun 230 volt
Weldy-Ref	Reflector Nozzle
Weldy-sol	Solder Sleeve reflector

Costech Heat Gun

All Costech heat guns provide a blast for both hot and cold air. With only two control switches, Costech heat guns are so simple to operate. Since the heat is not adjustable on the basic Costech heat gun, the temperature cannot be varied by mistake. The long-life ceramic elements in Costech heat guns can easily be changed. Available in 110 or 230 volts.

Costech Heat Gun		
Part Number	Temp °C	Wattage
S200	200	500
S400	400	1100
S500	500	1400

Costech Accessories	
Part Number	Description
Cos-Stand	Adjustable stand
Cos-Deflector	Deflector nozzle
Cos-Reducer	Reducer nozzle
Cos-Fin	Fin tail nozzle
Cos-Spot	Spot nozzle

Triac-S

The Triac-S is specifically designed for long running bench work and for use in confined spaces. The Triac-S features a high temperature element which is protected by photo cell and thermal cut-off allowing longer life. As an added safety feature, the Triac-S is fitted with a stay cool nozzle which operates while the gun is in operation. Temperature range is from ambient up to 600°C. Available in 110 or 230 volts.

Triac-S Accessories	
Part Number	Description
G57	Sieve reflector 50mm dia.
G57B	Sieve reflector 35mm dia.
G57C	Solder sleeve reflector 34mm dia.
